Name: _____

"Animal Eyes" Matching

Directions: Match the animal to the description of their eye

1. Hawk _____	A. This animal's eyes can see well enough at night to catch mice or other animals in the dark.
2. Owl _____	B. This animal has a third eyelid that is clear so they can keep water out of their eyes and swim with their eyes open.
3. Jumping Spider _____	C. This animal has eyes on the sides of its head so they can see in many different directions at the same time.
4. Dragonfly _____	D. This animal has better eyesight than humans and its eyes are bigger than its brain.
5. Coyote _____	E. This animal can see at night so they can run away from predators trying to eat them.
6. Beaver _____	F. This animal has two compound eyes which can see in all directions at the same time.
7. Flying Squirrel _____	G. This animal has no eyelids. Their eyes are protected by a clear, see-through scale.
8. Chipmunk _____	H. This animal has two eyes on the front of their head. This helps them tell how far away their prey is.
9. Snake _____	I. This animal has eight eyes to help them catch their prey.
